Mudra Shah

Python Developer · mudrashah66125@gmail.com · +91 99797 58106 · linkedin.com/in/mudra-shah-69580a1b6

Versatile Python developer with a persistent commitment to surpassing expectations. I enjoy turning messy requirements into dependable APIs, dashboards and real-time pipelines, and I'm eager to contribute to innovative projects alongside experienced professionals in a dynamic environment.

SKILLS

Languages: Python, HTML, JavaScript, CSS, Core Java, C++, C
Frameworks: Django, Django REST Framework, Vue.js, Bootstrap, React, FastAPI
Libraries & Tools: jQuery / Ajax, Celery, Git / GitHub / Bitbucket, SQLite3
Core & Messaging: PostgreSQL, Web Scraping (Scrapy), Kafka, WebSockets

EXPERIENCE

SDE, Feroai Freight Technologies LLP — Apr 2022 – Present

- Trained in Vue.js for building interactive web interfaces.
- Full-stack developer on a logistics-focused project, across frontend and backend.

Python & Django Developer, DEFTBOX Pvt Ltd — Apr 2022 – Apr 2025

- Engineered robust APIs with Django Rest Framework for seamless frontend–backend data exchange.
- Architected admin dashboards with role-based user management.
- Built device-rental web apps with credit-based systems, and booking platforms for flights, trains and hotels.
- Scraped tender websites with Scrapy to deliver business insights.
- Gathered requirements from clients and led a team of 2 interns.

Python Intern, Maxgen Technologies Pvt Ltd — Oct 2021 – Apr 2022

- Learned Python and Django by building a fully functional e-commerce project.

PROJECTS

RailDirect TMS – Fleet Management Modules — Next.js, TypeScript, PostgreSQL, Drizzle ORM

- Fleet management side of a transport management system running a haulier's own trucks, trailers and drivers alongside orders, trips and invoicing
- Driver and vehicle records, shift rosters and pre-shift checklists for trucks and trailers
- Maintenance scheduling, tyres, fuel and AdBlue tracking, and driver bonus calculation
- Document upload with expiry tracking
- REST API for the driver mobile app: checklists, fault reports and bonus
- Database migrations, tests and documentation

Dash v2 – Multi-tenant logistics & dispatch · BigFoot, IDS, RSA/DMS — Python, DRF, Vue 3, Vuetify, PostgreSQL/PostGIS, Celery, Redis

- Multi-tenant logistics and dispatch admin platform deployed for three clients
- Order management, trip planning and recommendation, GPS tracking, vendors, customers, contracts, invoicing, reports and patient transport
- Backend APIs and Vue admin screens for orders, trips, bulk upload, charges and invoices, load sheets, reports and user audit logs
- Client-specific work: haulage contracts and PDF invoices for one client, SSO login for another

TMS v2 – Transport Management System — DRF, Vue 3, PostgreSQL, Celery

- Transport management system covering orders, vendor management, spot bids and monthly RFQs, contracts, invoicing, incentives and reports
- Backend APIs and Vue screens for bid closure with email notifications, and RFQ export
- Vendor documents and document types, plus vendor notification preferences
- Trip expenses with categories, bulk creation and reports
- Permissions and bug fixes

GT Control Tower – Port Operations Command Center — Next.js, TypeScript, PostgreSQL, Drizzle ORM

- Gulftainer's internal operations dashboard: a live view of container gate movements, appointments, eTokens and fleet utilization, with AI-assisted decision support
- Dashboard screens, permissions and report queries
- Cut dashboard load time by moving heavy calculations into precomputed rollup tables
- CODECO gate-event feed into the TMS, plus a script that reconciles the two systems over a date range

TFS — React, FastAPI, Kafka, WebSocket, Mollie, Celery, PostgreSQL

- Full-stack platform with React + FastAPI
- Kafka for async service communication; WebSockets for live updates
- Mollie payments with a credit-based transaction model
- Admin dashboard for users, inventory, orders and warehouse operations
- Code reviews and guidance for junior developers

Mosadana Logistics — DRF, Celery, PostgreSQL, Vue.js

- Led design and implementation of backend APIs
- Real-time shipment monitoring, order processing, route planning
- Worked with a cross-functional team on frontend–backend integration

Tap2Cloud — Django, Celery, Redis, Kafka, WebSocket, PostgreSQL

- Device management app with admin dashboard for accounts, companies and invitations
- Marketplace for large electronic device rentals, credit-based, with automated halting via Celery
- WebSocket live updates and Kafka-based real-time data pipelines
- Mentored an intern and liaised with stakeholders

Alois Mueller WebApp — DRF, Celery, PostgreSQL, jQuery, Bootstrap

- Spearheaded API development and integration
- Role-based admin dashboard for technical content and user capabilities
- Organization creation and user invitations via internal API

HopoTrip — FastAPI, Celery, PostgreSQL

- APIs consuming TBO data, stored in PostgreSQL
- Booking platform for flights, trains and hotel rooms
- Role-based architecture and credit-based booking system

SaaS – Lead Advisor — Scrapy, Python

- Scraped multiple tender websites for a business management tool
- Fed a product management platform and a centralized document system
- Enabled category management for customized product visibility

PERSONAL PROJECT

Trip Planner – AI Travel Itinerary Web App — Next.js, React, TypeScript, Claude API

- Search by city, region or country, choose interests and number of days, and get a multi-city itinerary
- Summarises popular travel YouTube videos into day-by-day plans using Claude
- Attractions for each place, plus how to get there with airports and transport options
- Price estimates and live currency conversion
- Geocoding falls back to a second provider when the first has no match

EDUCATION

B.E. in Computer Engineering, Sal Institute of Technology and Engineering Research, Ahmedabad — Jul 2017 – May 2021

Higher Secondary – Science, Terf Higher Secondary School, Ahmedabad — Jul 2015 – May 2017

Secondary – Science, Terf Higher Secondary School, Ahmedabad — Jul 2014 – May 2015

CERTIFICATES & ACHIEVEMENTS

- Internship at Maxgen Technologies: Python & Django
- Python training, Internshala
- C, C++ and Core Java training, C-Dec institute
- Certification for outstanding progress from current employer
- Featured in a company video on my professional journey
